

Sandy Lane
A world of opportunity

13th September 2019

Dear Parent/Carer

We will shortly be launching "School Ping", our new communication system with parents and carers of children in our school.

"School Ping" is a system which will allow us to become a paperless school. This will help us to save thousands of pounds in printing and paper costs which can be used to provide the school with resources and equipment, which will in turn benefit your child. Using "School Ping" will also enable you to keep copies of all school letters and information sent by us on your electronic devices. There will no longer be a need to send back reply slips and ask for duplicate copies of letters for trips and clubs run by school as it will all be done on-line.

To successfully launch this new and exciting system, we must have email address for all parents and carers who would like to receive messages from school (there is no longer a limit to the number of family members who can receive school messages).

To start the launch process, everyone who already has an email address on our system will receive an invitation to join "School Ping" via email. Families who do not have an email address saved on the system will receive their invitation via letter. Invitations will be sent out on Monday 16th September.

We are hoping that all parents will support us in this new venture as it will greatly improve the communication between school and parents enabling us to do the very best for all concerned.

Should you have any questions regarding "School Ping", please do not hesitate to contact us and we will do our best to help you.

Yours sincerely,

Mrs F Newsome
Head of School
